

Education

VIT Bhopal University	Bhopal, Madhya Pradesh, India
B.Tech in Computer Science (AI & ML)	2023 – 2027
CGPA: 9.23	
St. Mary’s Senior Secondary School (CBSE)	Banda, Uttar Pradesh, India
Class XII: 82.2%	2022 – 2023
Class X: 97%	2020 – 2021

Technical Skills

- **Programming Languages:** Python, C++, Java, JavaScript, HTML, CSS
- **Frameworks & Tools:** React.js, FastAPI, Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Kaggle, SQL, pytest
- **Libraries & Technologies:** NumPy, Pandas, scikit-learn, TensorFlow, PyTorch, OpenCV, YOLO, NLTK, Matplotlib, Keras
- **AI/ML:** Machine Learning, Deep Learning, NLP, Computer Vision, CNNs, LSTMs, Reinforcement Learning, Behavioral Analytics, Model Evaluation
- **Platforms:** Linux, Windows, Amazon Web Services
- **Soft Skills:** Leadership, Communication, Problem Solving, Teamwork, Time Management

Experience

NetZero Aqua	Dec 2025 – Mar 2026
Intern (Full-time), Remote	
• Designed and developed a complete web application to support organizational workflows and operational data presentation. • Extracted aquaculture and environmental datasets using Microsoft Planetary Computer Explorer APIs for analytical processing. • Processed and analyzed datasets using statistical and mathematical computations for water quality parameter evaluation including pH, alkalinity, and turbidity.	

Projects

CareerLens AI – AI-Powered Career Intelligence Platform	Jun 2026 – Present
• Built an end-to-end career intelligence platform using React.js, FastAPI, scikit-learn, and PyMuPDF for automated resume analysis and candidate assessment. • Developed machine learning pipelines for Hire Probability Prediction, Job Role Prediction, Salary Estimation, and Skill Gap Analysis using Random Forest, TF-IDF Vectorization, and feature engineering techniques. • Implemented OCR-enabled resume parsing, candidate profiling, and real-time inference workflows. • Deployed production-ready frontend and backend services using Vercel, Render, Git, and GitHub.	
Cognivue – AI Cognitive Productivity & Focus Analysis System	May 2026 – Jun 2026
• Developing an AI-powered productivity analytics platform using OpenCV, PyTorch, FastAPI, and React.js. • Building computer vision pipelines for posture monitoring, focus detection, attention analysis, and behavioral pattern recognition. • Implementing productivity scoring, session analytics, cognitive performance monitoring, and burnout indicator modules.	
HerSakhi – AI-Powered Women Wellness Platform	Apr 2026 – May 2026
• Developed a full-stack wellness platform using React.js, FastAPI, and Supabase to provide personalized health tracking and wellness support. • Implemented secure authentication, menstrual cycle tracking, wellness analytics dashboards, and user profile management features. • Designed AI-assisted support modules for personalized wellness guidance and enhanced user engagement. • Deployed the application using Vercel, Render, and GitHub for scalable cloud deployment and streamlined development workflows.	

Certifications

NPTEL - Introduction to Internet of Things	Apr 2026
Coursera - Machine Learning with Python	Jan 2026
AWS - Cloud Practitioner Essentials	Sep 2025
NPTEL - Cloud Computing	May 2025
MathWorks - MATLAB Onramp	Aug 2023
